Thickness - 1.5 mm (± 10%)

EDGE BANDING SIZE

Size : 25mm (±5%)
Thickness - 1.2 mm

Important Information

Air bubble formations on Laminate :

- Using of water based adhesive or other than PVACP (Polyethylene Vinyl Acetate co-polymer) adhesive may also lead to air bubble after the installation of acrylic laminates. We recommend to use adhesive.
- Bonding of acrylic laminates under high humidity atmosphere.
- Using uneven surfaces substrate (Plywood, MDF, Particle Board) Lead to at particular area of acrylic laminates and air bubble appear at that area after the installation.
- Due to uncertain weather condition, base substrate may absorb moisture and after few days of installation base substrate gradually loses moisture resulting in air bubble formation between acrylic laminate and substrate.
- When more than 8' x 2' of Acrylic laminates is used for panelling, it can lead to air bubble after installation.
- Lack of bonding / pressing during the time of installation of acrylic laminates may lead to air bubble.
- Acrylic laminates should be kept evenly straight. It the laminates are in roll form, it should kept straight for minimum 48 hours and then can press and laminate on the surface for better results.

We are not responsible for any damage, cracks, bubbles or colour fading if the sheets are not checked when delivered and are not properly applied as instructed above.

Care of Laminates

Our Laminates are manufactured with aesthetics and durability in mind. When used as recommended and with appropriate care, our laminates will last through the years. Our laminates are easy to maintain.

- Cleaning should be done with water and clean non-abrasive cloth.
- To remove more stubborn stains, use mild household cleaners like colin IP gently wipe down with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleaners, bleaching compounds or solution as these may damages the surfaces of the laminate.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30 degree Celsius may cause damage to the laminate surface.
- Do not use the laminate for purpose that it is not intended for (E.g. do not iron, chop, hammer or expose the laminate to open flame).
- Outdoor application of the laminate with exposure to direct sunlight and weather conditions are not recommended.
- UV rays may reshape the laminate.
- Gloss surfaces are recommend only for vertical application.
- Do not use thinner and lolvene on the surface of the laminates. This may cause decourisation of the surface.
- Typically confirm to internationally recognize technical standards.
- Have a thickness balance of ± 10%.
- Peel off the protective film after processing.
